Promoting Skin Integrity – 24-Hours a Day.

Apollo Skin Care Products

Maintaining the skin integrity of long-term care residents is a round-the-clock responsibility. Not only is the skin the body's largest organ, but it is also highly susceptible to breakdown and infection if it is not cared for properly. A comprehensive skin care regimen must provide the correct amount of moisture to maintain healthy skin.

It is critically important to choose the right products, formulated with the right ingredients to meet the challenges of senior skin. A daily hygiene program that includes Apollo skin care products promotes health, healing and overall skin integrity. With more than 25 years of experience developing and producing high performance skin care products, Apollo offers a significant clinical advantage to your skin care program.

A Natural Approach to Skin Care. Apollo skin care products take a different approach than most. Formulated from natural ingredients, including lanolin oil, beeswax, Urea and lactic acid, Apollo products penetrate into the skin to attract water and perform their assigned functions: protecting, preventing, restoring, deodorizing.

Choosing natural ingredients means that Apollo products are gentler, more effective, and provide significant clinical differences. To your residents, that means more elastic and pliable skin and fewer infections. To your facility, that means you are making an excellent choice, opting for the very best outcomes for both your facility and your residents.

Hygena Wash™ – *Shampoo and Body Wash* – Excellent for shampooing, bathing and daily hygiene. Gentle, rinses completely and leaves no irritating soapy residue. Eliminates embedded odors on contact, leaving the skin smelling fresh and clean.

Therasol™ – *Natural Bath Oil* – Specially formulated to moisturize the entire body, Therasol relieves itching from dry, pruritic skin and locks-in moisture to help make skin smooth, soft and pliable.

Perine™ – *Perineal Care* – Ideal for all incontinent clean up, daily hygiene or whenever quick and easy no-rinse cleansing is needed. Rich, gentle foam is easy to apply and **stops odors on contact**. Excellent for bedside sponge bathing.

Apollo Cream™ – *Cream* – Specially formulated for red, sore, irritated skin, Apollo Cream helps brittle skin become elastic and pliable using vitamins A and D and natural lanolin oil. This vanishing cream easily penetrates the skin and contains beeswax to form a protective layer that shields the skin from irritants.

Thera 5™ – *Healing Lotion* – Formulated with 5% Urea and lactic acid, which are produced naturally by the body to control dry skin, Thera 5 helps attract moisture to moderately dry cells and hold it there, making the skin more elastic and pliable, without washing off with repeated hand washing.

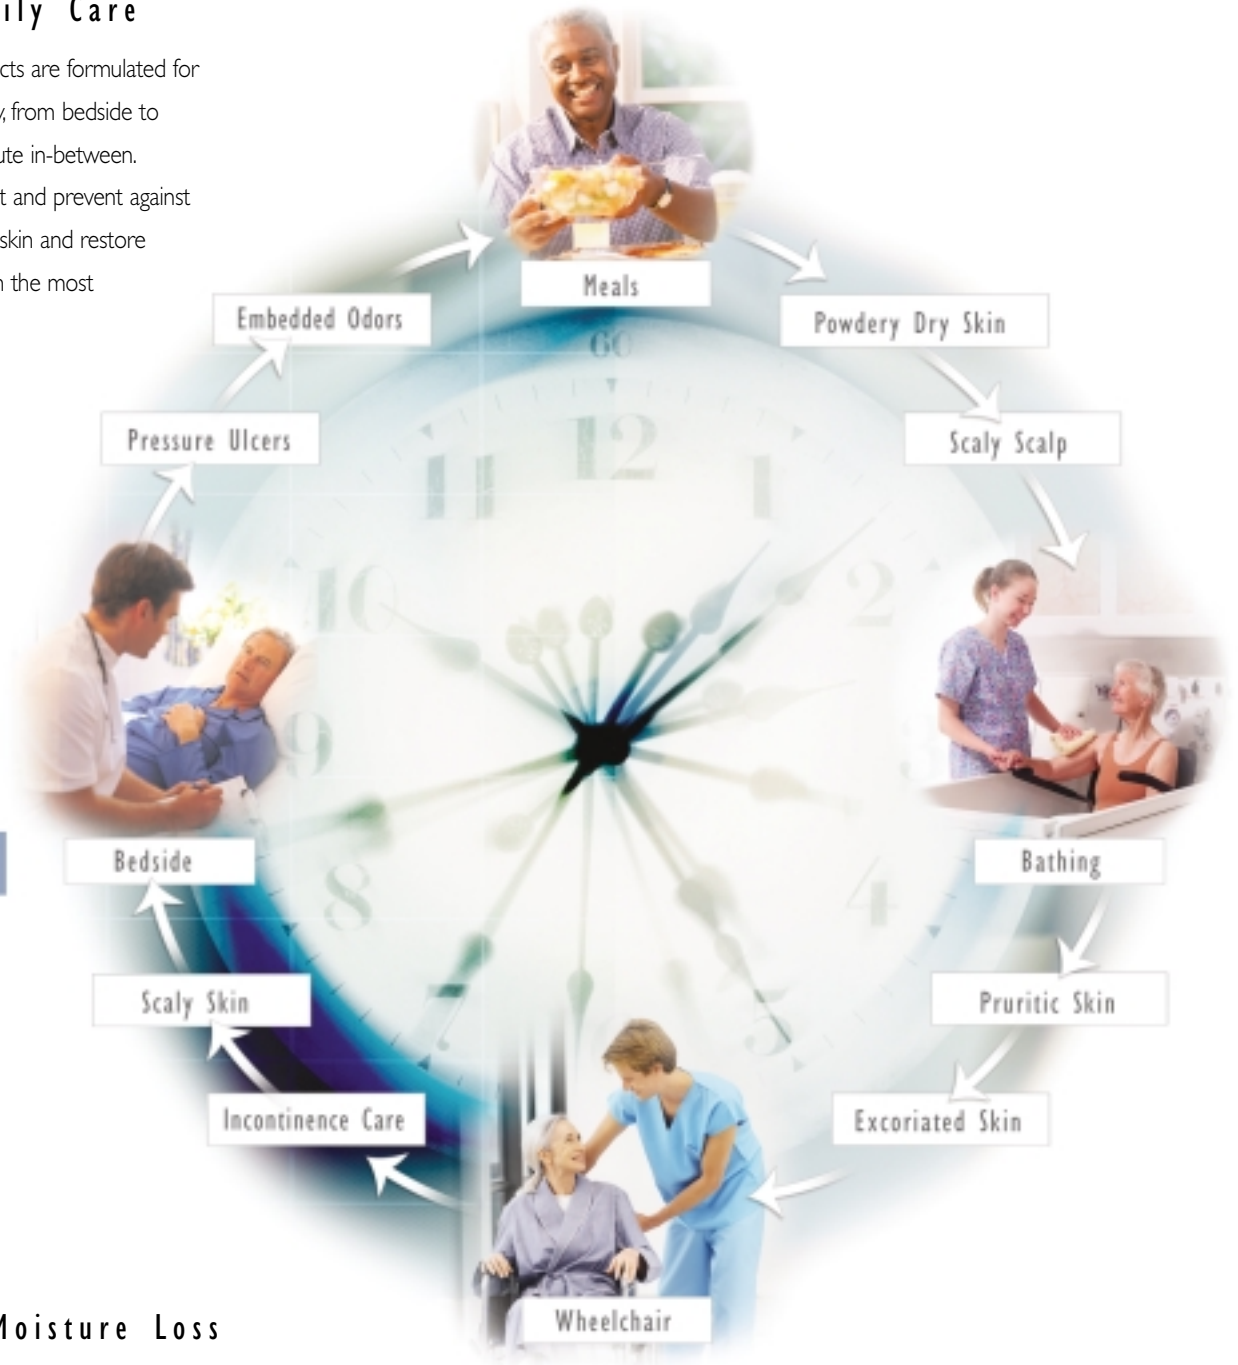

Thera 10™ – *Cream* – Specially formulated with 10% Urea and lactic acid, naturally occurring products dermatologists recommend to control dry skin. Near-prescription strength levels of Urea and lactic acid help attract moisture to severely dry skin cells and hold it there, promoting more elastic and pliable skin.

Shower Foam™ – *Shampoo and Body Wash* – Concentrated from a pump dispenser for foaming action. Its unique formulation eliminates embedded odors caused by BM, urine and emesis.

Comfortall™ – *Thermal Skin Conditioner* – Formulated to provide a thermal effect, Comfortall helps prevent chilling when applied to wet skin after bathing or showering. Combine with water for a supreme skin conditioner for delicate, dry or pruritic skin.

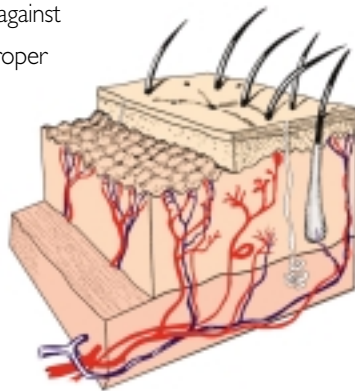

Circle of Daily Care

Apollo skin care products are formulated for use throughout the day, from bedside to bathing and every minute in-between. These products protect and prevent against damage to susceptible skin and restore skin integrity from even the most challenging conditions.

Preventing Moisture Loss

As the body's first line of defense against pathogens, the epidermis needs proper hydration to function effectively as a barrier to infection. Unlike other skin care products that form a thick, greasy barrier on the skin's surface, trapping the limited moisture in dehydrated skin, Apollo's natural ingredients absorb into the skin to replenish and maintain the proper moisture integrity of the epidermis, restoring its protective function.

Benefits

- Promotes skin integrity - an important part of a daily hygiene routine
- Formulated expressly for the aging and geriatric population that is more susceptible to skin breakdowns
- Natural ingredients like lanolin oil, beeswax, Urea and lactic acid to penetrate into the skin and moisturize from within
- Free of harsh dyes and organic materials, which irritate sensitive skin
- Formulated within the normal pH range for skin and hair (from 4.5 to 5.5 on the pH scale) to maintain the skin's natural pH balance
- Relieves itching of dry, pruritic skin
- Locks-in moisture
- Makes skin smooth, soft and pliable
